Reference for Mellowe Landscapes

Mellowe Landscapes have recently completed a large redevelopment of my garden. This involved removing 100 tonnes of earth and then redesigning and landscaping. All work was carried out to an excellent standard. The complex design work was done by Mel Lowe, who portrayed himself from the start in a professional manner, with a vast knowledge and enthusiasm for horticulture which set him well above the other 5 firms I had round to advise me. After speaking to him it was evident that he sets "perfection standards" for himself and his employees which as a customer was very reassuring. He did not disappoint with the work and everything he said he would do happened - and to schedule. He finished the project off with a custom made bench which he carved out of a tree he had removed - now a major feature in my garden! As I have mentioned, Mel is extremely passionate and proud of his work, and I have no hesitation in recommending him to someone considering a garden makeover, and would welcome a visit for people to judge for themselves. He is a credit to his profession.

Sincerely,

Paul Topping
